OBJECTIVE:

Seeking Software Engineering internship for Spring 2027

Education:

B.S. in Computer Science, GPA: 3.3

University of North Texas — Denton, TX

Expected Graduation: May 2027

Technical Skills:

- **Programming Languages:** C, C++, C#, Java, Python, HTML/CSS, SQL, BASH
- **Operating Systems:** Linux, Windows, MacOS
- **Developer Tools:** Git, GitHub, Visual Studio, VS Code, IntelliJ
- **Frameworks & Technologies:** Flask, Godot, AWS, Docker

Relevant Coursework:

Data Structures, Algorithms, Software Engineering, Database Systems, Logic Design

Projects:

Minecraft Server Manager | Python, SQL, Docker | Web-based Server Management App

- Developed a Linux-based web application for managing Minecraft servers through Docker containers.
- Built a Flask web interface that allows users to start, stop, and manage game servers from a browser.
- Stored server data and configuration settings in a SQL database for persistent access
- Used Docker to isolate each Minecraft server for a simple deployment.

Time Runner | Godot, C# | Time-Based Platformer Game

- Designed and developed a puzzle platformer where players can rewind time back five seconds.
- Implemented a time-recording system to track player movement, position, and actions.
- Built gameplay mechanics using C# scripts in the Godot game engine.
- Created level challenges centered around timing, movement, and rewind-based problem-solving.

UNT Quick Bytes | JavaScript, CSS, HTML, SQL | Food Database Viewer

- Developed a web application that displays food options served at UNT dining halls.
- Designed a front-end interface using HTML, CSS, and JavaScript to allow users to browse dining hall food data.
- Created a front-end page that pulled data from the backend server.
- Organized dining hall menu data to make food options easier for students to view and compare for dietary restrictions.
